

Our first Meeting in Finland

Our Finland experience took place from 17-21.05.2025. The teams from all countries met to continue working together on the project. One of the many activities was that the Finnish AI expert Teemu Ross led a workshop at a public event.

Through our productive work over the days, we can now announce that the reports on "Trends, Challenges, and Opportunities for TE Associated with the Integration of GenAI in Educational Settings" and "An Integrative Perspective on the Teaching Profession and TE," are ready and can be found on the website: [Click here!](#)

One goal has been achieved, but what next? The teams are currently working on a manifesto, which should be ready in the summer.
