

DECEMBER 2025

A presentation of the TE_REG Manifesto was held on 24.11.2025 at the Faculty of Philosophy, University of Montenegro, organized within the framework of the Teacher Education Regenerated (TE_REG): An Integrated View on Teacher Education in the (Gen)AI Era project.

The presentation was delivered by prof. dr Dijana Vučković, who introduced faculty members, students, and education professionals to the key principles and objectives of the Manifesto.

The event highlighted the project's mission to rethink and modernize teacher education in light of the rapid development of generative artificial intelligence. Following the presentation, a roundtable discussion was held with representatives from the study programs for Pedagogy, Teacher Education, Preschool Teacher Education, and Inclusive Education.

Participants exchanged perspectives on the relevance of the Manifesto for current educational practices and reflected on the challenges and opportunities that generative AI brings to the teaching profession.

In the next phase of the project, a thematic roundtable titled "How to Apply the Manifesto to Curricula and Study Programs" will be organized. This event aims to further explore the practical implications of the Manifesto and support the development of innovative, future-oriented approaches to teacher education.
