

A Focus Group was held at Centro de Formação Dr. Rui Grácio in Portugal to discuss the TE_REG Manifesto «Teacher Education Regenerated (TE_REG): an integrated view on Teacher Education in the (Gen) AI Era». Based on the contributions of this working session, a study report will be made. The participants were from the associated schools:

- 4 teacher trainers on continuing teacher education, in the areas of Curriculum Development, Citizenship Education, Information and Communication Technologies / AI in Education and Inclusive Education;
- 1 Head of a Curriculum Department;
- 1 Representative of the CFAE Rui Grácio Pedagogical Committee;
- 1 Teacher Evaluator (External);
- 4 teachers from different education cycles (2nd and 3rd cycles of Basic Education and Secondary Education).

The group analysed the emergence of Generative Artificial Intelligence (GenAI) that is profoundly transforming the ways of teaching and learning, changing the epistemological, social and professional conditions of education. In this context, teacher training faces a double challenge: on the one hand, the need to overcome practices based on rigid standards, often reduced to fragmented indicators and procedures; on the other, the urgency of critically integrating the potential of AI, while preserving the centrality of the human being in the educational process.

The TE_REG Manifesto emerges as a European guiding document that proposes an integrated, holistic and forward-looking vision of teacher education.
